

NeuroInsight Brain Tumor Analysis Report

Patient Name: john

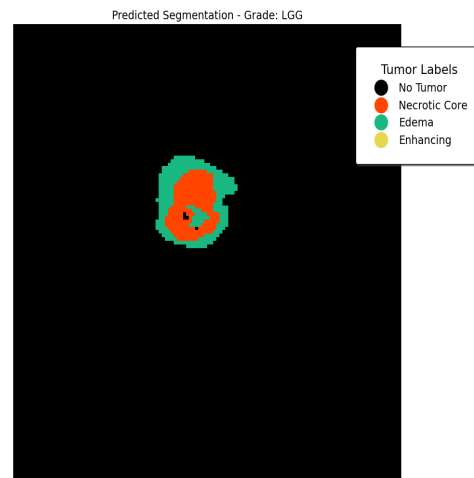

Tumor Grade: LGG

Report Date: April 20, 2025

MRI Scan Images

Original MRI Scan

Segmented Tumor Prediction

Analysis Summary

Growth Rate: Slow-growing tumor that tends to be less aggressive than high-grade gliomas.

Typical Symptoms: May include seizures that are often the first symptom, with other neurological symptoms developing slowly over time.

Clinical Significance: Generally has a better prognosis than high-grade gliomas. Treatment approach may be less aggressive depending on location and symptoms.
